Subject: draft 9/16 EJ Task Force Mtg summary

I meant to write this up just after the mtg to report back to Derek, Tina, and Nina. Do you want to add/change anything?

Sorry for the long delay in reporting back to you. Jackie Lane & I attended. Below is the agenda sent out in advance. Below are highlights from the meeting. The meeting did not discuss the Navy Shipyard or USEPA. Jackie and I were, however, prepared to speak about the IVAN complaint re dust and trucks from the Shipyard and the previous requests for USEPA involvement regarding dust at Candlestick park. We will instead send a written statement later. I announced to the group that I had placed on the IVAN website contact numbers for me, Jackie, Derek, and Lennar. We put out flyers about the Navy 10/24 bus tour and about EPA's EJ Civil Rights complaint process (because of questions we got at the last EJ Task Force Mtg). Lennar did not send a representative. Karen Cohn attended from the City health dept. From DTSC, Roger Kintz and a local enforcement manager attended.

Dust from Candlestick Park was the featured agenda item. John Marvin, an enforcement manager from BAAQMD, spoke. He supervises Dick Rodriguez, the inspector assigned to the neighborhood. He's the one who comes with us to many Shipyard inspections. John Marvin explained the BAAQMD regulatory role and inspection activities. Community members repeated their concerns from before. For example, the community members are concerned that the current monitoring locations close to the actual worksite do not capture information about dust that could be blown by swirling wind patterns up the hill from Candlestick Park. In addition, the residents want standards based on moisture content of sprayed soil and they want stop work to be automatic above certain windspeeds. The BAAQMD explained that their regulations do not use those measures. BAAQMD and the City committed to schedule a mtg to discuss the concerns regarding inadequacy of existing regulations. Karen (City Health Dept) committed to work with the EJ Task Force to set up a meeting with the City's building inspection office.

Dr. Espanola Jackson spoke about her distrust of developer and the City leadership. She stated that they are disregarding community health impacts to facilitate development.

The SFPUC representative reported back on two leaks from its sewage treatment plant that had caused odor complaints this summer. They committed to fixing the leaks.

Recology reported back on efforts to control odors and other nuisance problems related to its facility in Little Hollywood neighborhood near Hunters Pt Shipyard.

Other assorted complaints came in, not related to the Navy Shipyard.

The next mtg will be 10/21, 2-4 pm. This is the same day as Amy's mtg re transfer process, which is supposed to end at 2:30 pm. I have requested the EPA Volt and can give you a ride from Paul Hastings to the EJ Task Force mtg if you'd like.
